U.S. Patent and Trademark Office PTOL-303 (Rev. 11-03)

## **Continuation Sheet (PTOL-303)**

Continuation of 2. NOTE: Claim 11, line 3 the meaning of "time" has changed to elasped time, i.e. seconds previously it included reputitions. Claim 28 is unclear as to what "at least one of" is refering since temperature and velocity were not alternatives in original claim 28.

Continuation of 3. Applicant's reply has overcome the following rejection(s): The rejection based on Sheth is withdrawn in view of applicant arguments that the testing in Sheth is static and not a dynamic injection state.

Continuation of 5. does NOT place the application in condition for allowance because: Kamiguchi clearly teaches a relationship between the resin pressure and the resin temperature, see page 3 paragraph [0018]. Applicant's comments to "excluding the resin volume" is unclear as to how it relates to the present claims, Nunn '217 clearly disclose the obtaining and anazlying of the injection pressure, velocity, temperature and position/time.
